VESA compatible Flat Panel Accessory Mount

## VESA compatible Flat Panel Accessory Mount

### PRODUCT SPECIFICATIONS

- Mounts behind a Micros WS5 terminal or any 75 or 100 mm VESA compatible flat panel monitor, touch screen or terminal to support accessory devices such as video controllers or micro computers.
- The FPAM mount can support accessory devices above, below, or to either side of the back of the screen.
- A length of 2" wide hook and loop strapping easily adjusts to secure the accessory devices to the FPAM unit.
- FPAM units can be stacked to support additional accessory devices.
- A versatile hardware kit is included that attaches to the FPAM unit to support additional devices such as bump bars, card swipes, speakers and more.
- Add an optional 18" VGA cable to connect a video controller or micro computer to the monitor or touch screen. This custom short M/M cable reduces "cable clutter" behind the screen for a cleaner installation.
- This assembly is part of the UVHM system which includes many components that can be mixed and matched to create a support solution for any mounting location.
