Universal Back of Screen Controller Mount PN 80500

PRODUCT SPECIFICATIONS

- Mounts behind any 75 or 100 mm VESA compatible flat panel monitor, touch screen or terminal to support accessory devices such as video controllers or micro computers.
- The *Universal Back of Screen Controller* mount can support accessory devices above, below, or to either side of the back of the screen.
- A length of 2" wide hook and loop strapping easily adjusts to secure the accessory devices to the unit.
- *Universal Back of Screen Controller* mounts can be stacked to support additional accessory devices.
- A versatile hardware kit is included that attaches to the *Universal Back of Screen Controller* to support additional devices such as bump bars, card swipes, speakers and more.
- Add an optional 18" VGA cable to connect a video controller or micro computer to the monitor or touch screen. This custom short Male/Male cable reduces "cable clutter" behind the screen for a cleaner installation.
- Most of our modular mounting systems can be easily reconfigured in the field for a different application by either adding or removing a few parts to create a support solution for any mounting location.
- To order this assembly use part number 80500.
