A 19" wall mountable support system designed as a kit to create a complete Data / Telecom center for smaller systems

## A 19" wall mountable support system designed as a kit to create a complete Data / Telecom center for smaller systems

### PRODUCT SPECIFICATIONS

Our Wall Mount Data Telecom Kit is designed to create a complete Data / Telecom center for smaller systems. It includes the following components which are also available separately:

- 19-12-4U: A 19" wall mount bracket with 4U of rack space that will support network switches up to 12" deep.
- WRS18: A Wire rack shelf unit which is 18" wide and 10" deep to support network switches, hubs, modems, routers or other small equipment which are not rack mountable.
- 8P1UKPP: A 19" 1U patch panel with 8 port openings that accept any keystone standard jacks or inserts. It includes: a Telecom Jack Kit, 8 RJ11 telephone keystone jacks and bezels that create a "Telecom" patch panel right next to your network patch panel for all of the telephone line connections that support outboard PC modems, back up Credit card modems, and T1 or DSL uplink services.
- CM-19-1U: A cable management unit with cable routing that fits one "U" of standard 19" rack space.
