12"H X 12"D X 16"W Stainless Steel Equipment Enclosure

PRODUCT SPECIFICATIONS

- A rugged vented enclosure designed to provide a dry and secure location for store systems equipment such as the video controllers, point of sale servers, network switches, network patch panels, or other peripheral equipment.
- Overall dimensions 12"H X 12"D X 16"W
- All stainless steel construction.
- Two enclosures can be placed side by side or one atop the other to create additional space.
- The top, bottom and sides include rectangular cable entry points for DVI or VGA connectors.
- The top, bottom and sides also feature conduit knock outs for routing the associated wiring into the enclosure.
- The entire front cover is louvered for passive cooling and lifts off for easy access and has two simple thumb screws to secure the cover to the enclosure without tools.
