**An 18" W X 10"D wire rack shelf for supporting peripheral devices PN 80700**

NOTE: 80700 shown with peripheral equipment.

**An 18" W X 10"D wire rack shelf for supporting peripheral devices PN 80700****PRODUCT SPECIFICATIONS**

- The *WRS18-10 Wire Rack Shelf* is 10" deep and is the perfect location to install peripheral devices such as network switches, hubs modems, routers or other small equipment which are not rack mountable.
- The *WRS18-10 Wire Rack Shelf* is designed to attach directly to the wall either above, below, or above the *19-12-4U WMB 19" Wall Rack Mount Bracket* (PN 80650).
- Use with our optional *19-12-4U WMB 19" Wall Rack Mount Bracket* which has 4U's (or equipment units) of standard 19" rack mounting space and is 12" deep.
- Add an optional *8P1UKPP 8 Port Patch Panel* (PN 80725) with standard RJ11 jacks to create a patch panel for all of your telephone cabling and install all of your peripheral components such as modems, routers, etc, in the adjacent *WRS18-10 Wire Rack Shelf* for a completely organized data/telecom center.
- To order this assembly use PN 80700.
