General Features

- This assembly supports the MICROS Oracle 720 tablet in landscape orientation with a drop in charging cradle that permits continuous daily installation and removal of the tablet.

- This support solution is part of a full line of mounting brackets for rugged point of sale tablets including mounts for hand held POS and drop in chargers for mobile POS in hospitality environments.

- This system attaches to the edge of a shelf or countertop.

- The angled sides of the mount assist in guiding the tablet into the cradle and provide additional support once the tablet is installed.

- The cut out sections on the sides of the mount provide full access to the battery charging slot in the rear of the cradle.

- Includes a pair of hook and loop straps to secure the power supply transformer and surplus cable to the back of the mount.

- Installing the charging cradle onto the mount can be completed in seconds; first by inserting the cradle and then slightly tightening the rear lock screw.

- If necessary; the power connector can be easily unplugged from the charging cradle without having to remove the cradle from the mount.

- This support system allows adjustable side to side pan position adjustment of the 720 tablet; use the five point knob on the underside of the end of the arm to adjust and secure the tablet pan position.
