Wall Mount with an 8" arm and a Flat Printer Tray PN 80002**Adjustable 8" Arm Features**

- The 8" Arm supporting the Printer Tray can be easily adjusted side to side and locked in any position at the mounting surface with a five point hand knob. The position can also be permanently secured with a lock screw.
- The Flat Printer Tray position can be easily adjusted side to side and locked in any position at the end of the Arm with a five point hand knob under the tray. The position can also be permanently secured with a lock screw.
- Made from steel and finished with a durable, black, low gloss, micro wrinkle powder coat that resists fingerprints.

Flat Printer Tray on an Adjustable Arm

- A universal mount that works with most POS printers.
- The interior dimensions of the Flat Printer Tray are 6½" W X 10¼" L X 1" D.
- Includes a 1¼" diameter hole on one end for routing the power and data cables below the tray if desired.
- Includes multiple sets of tie point holes for inserting cable ties to secure the power and data cables if desired.
- Tightening the five- point knob below the end of the Arm applies variable resistance to allow adjustment of the side-to-side pan position of the Tray. A 10-32 Phillips head screw in one of the center holes can be tightened into one of the holes on the end of the arm to permanently secure the side-to-side pan position.

This printer mounting system is compatible with the following POS Printers:

- Note: interior dimensions of the Printer Tray = 6½" W X 10¼" L X 1" D.
- Anser U2, Brother QL 800, Brother PTP700, Citizen CT-E351, Clover P500, Clover Mini, Custom America CT-E351, Dymo LabelWriter 450, Dymo LabelWriter Wireless, Dymo LabelManager PnP, Epson TM-T88V/VI, Epson TM- T20II, Epson TM - L90, EpsonTM-U220 Type B & D, POS-X Evo HiSpeed, Rollo Printer, Sato FX3-LX, Sato WS2, Square Terminal, Star Micronics mC-Print3.

Single Wall Mounting Plate with Standoff Bracket and Arm

- The Standoff bracket attaches the arm to the mounting plate and allows it to travel horizontally allowing a wide range side to side positioning options.
- Attach the mounting plate to the Wall or other flat vertical surface with appropriate fasteners.
- Note that the Standoff bracket and arm can be attached to the mounting plate with the mounting plate in either vertical or horizontal orientation.
- Tightening the five- point knob on the top of the Standoff Bracket applies variable clutching resistance to allow adjustment of the side-to-side pan position of the Arm.
- To permanently lock the side-to-side pan position of the Arm; slightly loosen the 10-32 Phillips head screw on the top of the Standoff bracket, move the arm to the new desired permanent position; tighten the screw into one of the holes in the end of the arm to secure the new position.
- The Single mounting plate includes slots so that it can be attached to poles with compatible hose clamps.

Installation Tips for printer Mounting Systems

1. 1 Installation of this assembly must be performed by qualified persons.
- 1.2 Use fasteners that are appropriate for the materials and structure of the mounting surface.

Locating a Screen or Printer mount and examining the range of Motion of the arm(s).

- 1.1 Cut a section of blue painter's tape that is the same width as the mounting plate and keep this handy.
- 1.2 Carefully Lift the mounting system, and place the mounting plate in contact with the mounting surface at the proposed mounting location; then consider if the location of the VESA pan and tilt head or printer tray are accessible; but also not creating any conflicts with other items in the work area. If the system has movable arm(s) move these through their entire range of motion and look for conflicts. If conflicts are found; adjust the proposed location of the mounting plate as needed. When the optimum location is discovered; apply the tape to the spot on the mounting surface.
- 1.3 An alternate method that can be used as an aid in determining the best location for screens or printers is to make a cardboard cut out that has been shaped to closely match the overall dimensions of the intended screen or printer tray. (In a pinch you can also use a tray or a pizza box as a stand in for a screen.) Use these cardboard models as stand in for the actual equipment to assist in demonstrating the best positions of screens or printers.
- 1.4 If the screen or printer is supported by an arm; locate the pivot points of the arm and then carefully guide the VESA head or printer tray horizontally through the entire range of movement to determine optimum location for the mounting plate. When this location is discovered; apply the tape to the spot on the mounting surface.
