PRODUCT SPECIFICATIONS

General Features

- Features an integral Keystone port that accepts any standard data jack insert.

- When installed horizontally, the mount allows the Wireless Access Point to tilt up or down 30 degrees.

- Made entirely of galvanized steel to resist corrosion.

Mounting Features

- Attaches directly to any flat vertical or flat horizontal surface.

- Attaches to ANY Type of standard electrical junction box: single gang, double gang, 4S or 5S

- Attaches to any standard vertical suspended ceiling support wire.

- Attaches directly to any standard ½" conduit connector.

- Includes mounting holes for two standard "beam clamps" which can be added to permit the mount to be attached directly to any overhead beam.

- Attaches to the back of the Wireless Access Point unit without tools using the "TEE BAR" attachment points.
