PRACTICAL QUALITY SYSTEMS
Fast Custom Manufacturing - Nationwide Installation Services

PN 80135 Long Arm

PN 80136 Short Arm

General Features

- Both of these shelf edge mounts can be used as a universal support system for VESA compatible monitors, touchscreens and terminals for Point of Sale / POS, Kitchen Display Systems / KDS in commercial kitchens, retail, restaurants, offices, industry, shops, medical, maritime, schools, laboratory and many other applications.
- An innovative set of joint assemblies allow seven axis of position adjustment when attached to a shelf or other horizontal surface.
- Beyond having flexible articulation; this mount has the key feature of being easily LOCKED in any desired screen position; this ability is VERY important when using touch screen equipment as it PREVENTS the screen from moving away from the user each time a touch is input.
- This assembly supports up to 25 lbs., is made from steel and finished with a durable, silver-gray, semi-gloss, powder coat that resists fingerprints and emulates stainless steel.
- Visit kitchendisplayssystems.com for a free, easy to understand tutorial that covers all aspects of Kitchen Display Systems knowledge!
- For more information on the individual components included in this package please refer to the assembly sketches in this document and the downloadable product information sheets available on our website for each of the product pages for each part number.

Enhanced VESA 75/100mm Pan and Tilt Head with side-to-side Tilt adjustment on an Adjustable Arm

- A universal mount that works with any 75mm or 100mm VESA compatible screen.
- Tightening the 2 four-point knobs applies variable clutching resistance to allow adjustment of the up and down tilt position of the screen. Tighten either of the two 10-32 Phillips head screws adjacent to the four-point knobs to permanently secure the tilt position.
- Tightening the five- point knob below the end of the Arm applies variable clutching resistance to allow adjustment of the side-to-side pan position of the screen. Tighten the 10-32 Phillips head screw on the lower Panning plate into one of the holes in the end of the arm to permanently secure the pan position.
- Tightening the three - point knob at the rear center of the VESA mounting plate applies variable resistance to allow adjustment of the side-to-side screen tilt position.
- Includes 4 pieces of M4 Phillips head screws to attach the VESA mounting plate to the back of the screen.

Double Cross Receiver with Sliding L Arm and Sliding Straight Arm

- The Double Cross Receiver allows two arms to be joined at 90 degrees angles from each other in either the horizontal or vertical plane.
- To adjust the positions of the arms; remove the 3/16" push pins to adjust the extended positions of the Sliding L Arm and the Sliding Straight Arm in the Double Cross Receiver to the desired positions; then reinsert the pins.
- Note that the L arm and the Straight Arm can be inserted into the Cross Receiver in a variety of ways to create multiple different configurations.

Panning Shelf Edge Receiver Mounting Plate and Sliding Straight Arm

- The Panning Shelf Edge Receiver Mounting Plate supports one arm assembly and can be attached above or below any flat, smooth horizontal surface.
- Attach the mounting plate to the mounting surface with appropriate fasteners.
- To adjust the arm position; remove the 3/16" push pin to extend or retract the position of the Sliding Straight Arm in the Panning receiver to the desired position; then reinsert the pin.
- To adjust the side-to-side pan position of the Straight Arm; remove the 10-32 Thumbscrew from the top of the Panning receiver; adjust the arm position, then reinstall the thumbscrew into one of the holes in the top of the round section on the mounting plate.

Installation Tips - How to Attach the VESA Pan and Tilt Head assembly to the back of a screen:

1. Lay the screen face down on a flat, smooth surface.
2. Hold the VESA Pan and Tilt Head assembly securely, remove the five-point hand knob, lift off the VESA Pan and Tilt Head assembly, and remove the rubber clutch washer from the top of the end of the arm.
3. Orient the flat bottom of the panning base of the VESA Pan and Tilt Head assembly with the bottom of the screen.
4. Set the VESA Pan and Tilt Head assembly with the VESA mounting plate facing down on the back of the screen.
5. Align the square pattern of either 75mm or 100mm spaced holes in the VESA mounting plate with the pattern of four tapped holes on the back of the screen.
6. Carefully install the four supplied M4 screws through the holes in the VESA mounting plate and into the tapped holes on the back of the screen.
7. Place the rubber clutch washer on the top of the end of the arm.
8. Carefully lift the Screen with the attached VESA Pan and Tilt Head assembly, align the tapped hole in the panning base with hole in the rubber clutch washer on the top of the end of the arm, reinstall the shaft of the five-point hand knob up through the underside of the arm, through the rubber clutch washer and then carefully thread it into the panning base.

USE APPROPRIATE FASTENERS
TO ATTACH BASE PLATE TO
MOUNTING SURFACE

PN 80135 Long Arm

This screen mounting system is compatible with the following POS systems:

- Lightspeed, logic controls, NCR, elotouch, posiflex, Poster POS, ehopper, Beetrionics, Tysso, favpng, Touch Dynamic, FastSpring, CAKE, Erply, Sapaad, Upserve, Salesforce Commerce Cloud, Block, Miva Merchant, Epos Now, QuickBooks POS, Shopify, VEND, Revel, Clover, CovaPOS, Oracle NETSUITE, MICROS, GoDaddy, Helcim, Epos Now, Upserve POS, Elo, CardConnect, NCR, ALOHA, SQUARE, Posnation, KORONA POS, BEMETECH, toast, Touchbistro, LAVU, Partnertech.

Installation Tips for Screen Mounting Systems

- 1.1 Installation of this assembly must be performed by qualified persons.
- 1.2 Use fasteners that are appropriate for the materials and structure of the mounting surface.

Tips for locating KDS or POS Screen Mounting Systems

- 1.1 Care must be taken when locating KDS or POS Screens so that the display can be easily seen by the users (and in some cases touched); and also so that the screen does NOT block access to the pass through window or items such as ingredients, plates, microwaves, etc. that are located on the adjacent shelves.
- 1.2 As a general rule of thumb KDS and POS screens should be located to place the center of the display at, or just above, eye level.
- 1.3 Most KDS screens are supported by mounting systems that are attached directly to the edge of existing kitchen shelves above a production work station or expo area. POS Screens are most often attached to counter tops, Under counter, shelf edges or walls.
- 1.4 Conduct a careful survey of each POS station, Kitchen work station or expo area. Stand where the users will be standing at their work stations and consider all possible screen locations. Again ; the screens should be located where they are readily accessible; but also where they do not limit access to other important items in the work area.

Locating a Screen or Printer mount and examining the range of Motion of the arm(s).

- 1.1 Cut a section of blue painter's tape that is the same width as the mounting plate and keep this handy.
- 1.2 Carefully Lift the mounting system, and place the mounting plate in contact with the mounting surface at the proposed mounting location; then consider if the location of the VESA pan and tilt head or printer tray are accessible; but also not creating any conflicts with other items in the work area. If the system has movable arm(s) move these through their entire range of motion and look for conflicts. If conflicts are found; adjust the proposed location of the mounting plate as needed. When the optimum location is discovered; apply the tape to the spot on the mounting surface.
- 1.3 An alternate method that can be used as an aid in determining the best location for screens or printers is to make a cardboard cut out that has been shaped to closely match the overall dimensions of the intended screen or printer tray. (In a pinch you can also use a tray or a pizza box as a stand in for a screen.) Use these cardboard models as stand in for the actual equipment to assist in demonstrating the best positions of screens or printers.
- 3.4 If the screen or printer is supported by an arm; locate the pivot points of the arm and then carefully guide the VESA head or printer tray horizontally through the entire range of movement to determine optimum location for the mounting plate. When this location is discovered; apply the tape to the spot on the mounting surface.

Partial list of Compatible Touchscreen Computers, Interactive displays, All-in-One PCs

- elo Touchscreen Computer and Interactive displays 10-inch I-Series 4 for Android E389883, E411266, E390647, E411643.
