PRACTICAL QUALITY SYSTEMS

Fast Custom Manufacturing - Nationwide Installation Services

General Features

- This Countertop mount can be used as a universal support system for VESA compatible monitors, touchscreens and terminals for Point of Sale / POS, Kitchen Display Systems / KDS in commercial kitchens, retail, restaurants, offices, industry, shops, medical, maritime, schools, laboratory and many other applications.
- An innovative set of joint assemblies allow three axis of position adjustment including 6" of height adjustment when attached to a Countertop or other horizontal surface.
- Beyond having flexible articulation; this mount has the key feature of being easily LOCKED in any desired screen position; this ability is VERY important when using touch screen equipment as it PREVENTS the screen from moving away from the user each time a touch is input.
- This assembly supports up to 15 lbs., is made of steel and finished with a durable, black, semi-gloss, powder coat that resists fingerprints.
- Visit kitchendisplaysystems.com for a free, easy to understand tutorial that covers all aspects of Kitchen Display Systems knowledge!
- For more information on the individual components included in this package please refer to the assembly sketches in this document and the downloadable product information sheets available on our website for each of the product pages for each part number.

Standard VESA 75/100mm Pan and Tilt Head on a Telescopic Pedestal

- A universal mount that works with any 75mm or 100mm VESA compatible screen.
- Tightening the two 5/16-18 bolts applies variable clutching resistance to allow adjustment of the up and down tilt position of the screen. Tighten either of the two 10-32 Phillips head screws adjacent to the four-point knobs to permanently secure the tilt position of the screen.
- The adjustment of the side-to-side pan position of the screen can only be done when the height of the telescopic section is adjusted.
- The two 10-32 Phillips head screws locate on the bottom of the pan bracket are used to secure the cable cover.
- Includes 4 pieces of M4 Phillips head screws to attach the VESA mounting plate to the back of the screen.

Telescopic pedestal section and internal cable path

- The pedestal section elevates the VESA pan and Tilt head above the mounting surface and includes two vertical telescopic sections; the outer/ lower fixed section and the inner/ upper adjustable section.
- Before attaching the mounting plate to the countertop with appropriate fasteners; evaluate the range of up and down motion of the inner telescopic section.
- The height adjustment screw secures both the side-to-side pan position and the height of the screen.
- The height of the screen as measured from the center of the pan and tilt head; is adjustable from 9" to 15" above the mounting surface.
- **To reset the height and pan positions of the VESA pan and Tilt head above the mounting surface;**
 1. Carefully support the screen and loosen the Allen head lock screw just until the screen with the Pan and tilt head can be lifted.
 2. Carefully lift the entire inner/ upper adjustable section assembly with the screen until the new desired height AND side to side pan positions of the screen are achieved; then re-tighten the lock screw.
 3. **IMPORTANT NOTE=** a minimum of 1/2" of the inner / upper adjustable section **MUST** extend down past the lock screw inside of the outer/ lower pedestal section.
